

Participate in a Dravet Syndrome Genetic Study

The Genetic Investigation of Childhood Neurological Disorders

Joseph Gleeson, M.D.

And his team at UCSD seek to identify new causes of Dravet syndrome

Who Can Help?

Families with

*Prefer at least 2 members with epilepsy & at least one with Dravet syndrome

Also accepting Dravet participants without a family history of seizures

*Dravet syndrome as a primary diagnosis & no SCN1A mutations found

*Epilepsy or Dravet syndrome must **not** be due to trauma, tumors, CNS infection, stroke, pregnancy or birth complications or other environmental factors

Participating in Research

At no cost to you, includes

- *filling out a medical questionnaire, a consent form, and release of medical records form
- *donating DNA: saliva or blood for genetic analysis
- *genetic analysis, with positive results reported to your doctor upon your request
